**Hunt Group Set Up**

**\$5 Set Up and \$5 a Month**

**Call Hunting**

Use call hunting to distribute calls between multiple numbers. Once you have setup your hunt group information below, just change the ring-to number of your desired number to point to your hunt group. There are two types of Call Hunting available.

**Follow Me (Linear):**

Hunting will always begin with the first number on the list and continue down the list in order.

**Call Distribution (Circular):**

Hunting will begin with the next number on the list after the number where hunting ended on the previous call.

**Timer**

The global timer is not applicable to the Follow Me (Linear) hunting type.

**End of Hunt**

**If the call is not answered, or if hunting times out:**

Enter the phone numbers below that you would like to include in your hunt group, and specify the number of seconds that each number should be attempted. (Each ring is approximately 4 seconds.) If a number is inactive or busy, hunting will continue on to the next number on the list. All calls sent to a Hunt Group are considered to be answered, even if no one is available to take the call.

NUMBERS	SECONDS	ACTIVE?
